TAB GROUPS

The workbook is organized in numbered groups. Each group opens with its own index tab, printed here, that lists its tabs and what each one does: 2. INDEX (6 tabs); 3. REVIEW (3 tabs); 4. TAXPREP (2 tabs); 5. REFERENCE (2 tabs).

CELL COLOURS

- Input: type here
- Calculated (locked)
- Linked from another tab
- Tie-out / check

The same colour key sits beside the print area of every tab in the workbook.

WHAT WAS LEFT OUT

- Detail lines with no amount in any column: 23 lines across the schedules. In each section the first 2 such lines still print, so the lines that exist in the workbook stay visible.
- Not printed: .Rules, Disclaimer. They are in the workbook.
- Tabs without a print area in the workbook were printed up to their last column with content, across as many pages as needed, instead of being shrunk onto one page: 2. INDEX, Questionnaire, Schedule A, Shares, Consideration, Penalty, Certification, 3. REVIEW, Summary, Schedule A Totals, Checks, 4. TAXPREP, Import Map, 5. REFERENCE, Rates, Notes.
- Wide tabs printed in landscape across several pages at a readable size (in the workbook they are set to fit one page width): Summary, Schedule A Totals, Import Map, Rates, Notes.

CHECKS

Most tabs begin with their own checks, and the Checks tab lists them all with a status of OK, INFO, WARN or ERROR. The page headers show the workbook status. A reviewer resolves every ERROR and documents every WARN before the return is filed.

PAGE FOOTERS AND NAVIGATION

Each worksheet page carries the tab name and its page number in this document. The bookmarks and the contents page link to the first page of every tab.

Colour code

The same code runs on every tab.

- **Input** Type or paste here, following the row's sign, unit and period.
- **Formula / linked** Calculated, or read from another tab: trace it, never type over it.
- **Prior year** Last year's figure, for comparison only: confirm its source.
- {a} **Tickmark** A maroon letter such as {a} marks a figure a note explains.

Before you file

One form per transfer date. Compare every field Taxprep imports with the signed T2058 and Schedule A Totals; the workbook's screens are not legal conclusions.

Competent tax review is required. A cleared check confirms only its stated condition; review material calculations and reconcile transferred amounts before filing.

ELECTION QUESTIONNAIRE

Working papers for T2058 E (25) — Election on Disposition of Property by a Partnership to a Taxable Canadian Corporation, under ITA 85(2). Answer each question in the yellow box; it is the only cell to type in. The grey column is the form's own guidance — it never answers for you. A blank answer is Unanswered: it is not "No", and no tab is hidden for it. To import into Taxprep, use Export Import to CSV (Part 3) and give Taxprep the CSV, never this workbook; the codes it sends are candidates to confirm with a first Taxprep import (Import Map).

T2058 Part 3 — information required: Yes / No / N/A

Question	Your answer (Yes / No / N/A)	Guidance (from the form)	Status
16. Is there a written agreement relating to this transfer?	Yes	"No" and "N/A" are different answers; an incomplete election may be considered invalid.	OK

18. Does a price adjustment clause apply to any of the properties? (See Income Tax Folio S4-F3-C1 for details)	Yes		OK
19. Do any persons other than the members of the partnership own or control directly or indirectly any shares of any class of the transferee?	No		OK
20. Does a non-arm's length rollover exist between the partnership(s) and the transferee corporation?	No		OK

23. Are any partners non-residents of Canada?	No		**OK**
24. If yes, are any of the properties transferred taxable Canadian properties?	N/A		**OK**

The form also requires material to be PREPARED and kept, though not filed: the ACB calculation for every transferred property, a summary of how each FMV was evaluated, supporting schedules, the designation of the order of disposition of depreciable property, and documentation behind the answers above.

The form cites Information Circular IC76-19, Interpretation Bulletins IT-291 and IT-378, and Income Tax Folio S4-F3-C1.

PART 2 — WHICH PARTS OF THE FORM APPLY (TAB FILTER)

Question	Your answer (Yes / No)	Guidance	Status
25. Are shares of the capital stock of a PRIVATE corporation included in the property disposed of?	No	If yes, list them on the Shares tab (name, business number, total PUC).	**Not applicable**
26. Is the election filed after its due date, or is it an amended election? (the Part 2 late-filing penalty applies)	No	If yes, the Penalty tab computes amounts 2A, 2B and 2C and line 320.	**Not Applicable / Hidden**

Tabs are grouped behind four numbered divider tabs: 2. Fill in, 3. Review, 4. Taxprep, 5. Reference. The numbers are the same on every template; an election has no prior year, so there is no 1. Prior year.

PART 3 — MACRO CONTROLS: PROPERTIES, TAB FILTER, TAXPREP CSV

Property rows on Schedule A	25	**Properties in use**	4

Asks how many property rows you need (2 to 500; 25 as shipped) and inserts or deletes whole rows on Schedule A, so every total, check and lookup grows with the file. It refuses to delete a row that holds data.	Hides every tab whose status in Part 2 reads "Not Applicable / Hidden". Unanswered tabs stay visible.	Unhides every tab.

Writes the Import tab (the candidate Taxprep codes and their values) to <workbook name>_Import.csv beside this workbook. Give Taxprep the CSV the Export Import to CSV button writes, never this workbook.

The buttons need macros enabled (File > Options > Trust Center, or the yellow "Enable Content" bar). Without macros the workbook still works at 25 property rows, and the Import tab can be copied into a CSV by hand (columns A and B, from row 1).

Give Taxprep the CSV the Export Import to CSV button writes, never this workbook. The codes the CSV carries are CANDIDATES read off the Taxprep Forms cell-ID list: confirm them on the first import (Import Map lists each one).

Choose the property type (the Schedule A block) in column J: it sets the line codes and the floor rule. The agreed amount must sit inside the range shown to its right: its lower end is the GREATER of the boot (subsection 85(1)(b) deems the elected amount up to the non-share consideration) and the lesser of the FMV and x+2 (s.85(1)(c.1), (e)), and it never exceeds the FMV. Read-only except the yellow cells. Every figure links to Schedule A and the Shares tab.

A. WHAT WAS TRANSFERRED, AND WHAT CAME BACK

Form line	Description	Authority	Amount	Tick	Note
	Total FMV of the property disposed of (Schedule A)		300,000		
	Total agreed amount elected (Schedule A)	ITA 85(1)(a)	71,002

	Total FMV of all consideration received (Schedule A)		300,000		

B. SUBSECTION 85(2.1) — PAID-UP CAPITAL GRIND

Form line	Description	Authority	Amount	Tick	Note
	Does section 84.1 or 212.1 apply to a disposition of shares on this election? (shares of a Canadian corporation transferred to a non-arm's length corporation connected with it afterwards — s.84.1 for a Canadian-resident transferor other than a corporation, s.212.1 for a non-resident). If Yes, subsection 85(2.1) does not apply and the paid-up capital below is left blank	ITA 85(2.1); 84.1(1); 212.1(1), (6)			
254	Paid-up capital of the shares issued, otherwise determined — the total of Part 4 code 254 on the Shares tab	ITA 85(2.1)	240,000		Typed once, in Part 4 (Shares tab).
	Reduction under subsection 85(2.1) — PUC otherwise determined, less (agreed amount minus boot), where positive	ITA 85(2.1)	228,998		
	Paid-up capital of the shares issued, after the grind		**11,002**		

Section 85 cannot be used to create paid-up capital. Whatever tax cost was given up, the PUC of the shares is held down to it — so shares issued with a stated capital equal to the property's FMV, against an election at cost, have most of that PUC taken straight back. Nothing on the T2058 itself says so. Not where section 84.1 or 212.1 applies: those sections set the paid-up capital, and any deemed dividend, themselves.

C. ORDER OF DISPOSITION — DEPRECIABLE PROPERTY

Where more than one depreciable property of a class is transferred, the Minister may determine the order of disposition unless the transferor has DESIGNATED it before the filing due date for this election. The form does not carry the designation; it is one of the documents Part 3 says must be prepared and kept. Record it here and keep it with the file.

Leave this tab empty when the election is filed on time. An election may be filed within three years of its due date if an estimate of the penalty is paid at the time of filing (Rates: late_years), and later than that only at the Minister's discretion, with a written explanation attached and an estimate paid.

CALCULATION OF THE LATE-FILING PENALTY

Form line	Description	Authority	Amount	Tick	Note
	Total fair market values of the disposed properties from Schedule A		300,000		
	Total agreed amounts of the disposed properties from Schedule A		71,002		
2A	Subtotal (total fair market values minus total agreed amounts)	ITA 85(8)	228,998		
	Number of months — each month or part of a month from the filing due date to the actual date filed	ITA 85(8)			A part of a month counts as a whole month.
2B	Amount 2A × 1/4 × 1% × number of months	ITA 85(8)(a)	-		
2C	$100 × number of months (2C cannot exceed $8,000)	ITA 85(8)(b)	-		The $8,000 cap is on 2C (85(8)(b)); the penalty, the lesser of 2B and 2C, therefore never exceeds $8,000.
320	**Late-filing penalty — amount 2B or amount 2C, WHICHEVER IS LESS**	ITA 85(8)	-		
400	Amount enclosed				

Cheques payable to the Receiver General. Write "T2058", the name of the partnership (transferor), the partnership account number and the partnership's tax year-end on the back. Daily compound interest at the prescribed rate applies to unpaid amounts, including the penalty itself.
